Fill in the blanks

1. Mystery of Shakespeare

For all his fame and celebration, William Shakespeare remains a **mysterious** figure with regards to personal history. There are just two primary sources for information on the Bard: his works, and various legal and **church** documents that have survived from Elizabethan times. Naturally, there are many **gaps** in this body of information, which tells us little about Shakespeare the man.

2. Laurence Stephen Lowry

Laurence Stephen Lowry RBS RA was an English artist. Many of his drawings and paintings depict Pend lebury, Lancashire, where he lived and worked for more than 40 years, and also Salford and its surrounding areas.

Lowry is famous for painting scenes of life in the industrial districts of North West England in the mid-20th century. He developed a distinctive style of painting and is best known for his urban landscapes peopled with human figures often referred to as matchstick man. He painted mysterious unpopulated landscapes, brooding portraits and the unpublished "marionette" works, which were only found after his death.

1

3. Animals

In animals, a movement is coordinated by a cluster of neurons in the spinal cord called the central **patterns** generator (CPG). This produces signals that drive muscles to **contract** rhythmically in a way that produces running or walking, depending on the pattern of pulses. A simple signal from the brain instructs the CPG to switch between different **modes**, such as going from a standstill to walking.
